

Carlos Castaño Santos

>>> APPLIED DATA SCIENTIST

PERSONAL SUMMARY

Junior Data Scientist and recent graduate (9/10 GPA) with a strong foundation in data mining, processing, and machine learning modeling. Experienced in transforming raw data into structured pipelines and predictive models to solve complex problems.

MAIN ACADEMIC BACKGROUND

Universitat Oberta de Catalunya

Applied Data Science degree

Graduated: 06/2026

- Median Grade: 9/10 (High Distinction)

GITHUB PROJECTS

- **Data-mining**
 - IMDB Sentiment Analysis & NLP: Transformers (DistilBERT), Word2Vec and LDA for knowledge extraction
 - Retail Market Basket Analysis: supermarket case study, Apriori algorithm, sales anomalies and customer patterns to actionable business strategies.
 - Ensemble Regression Modeling: Linear Regression, kNN, Decision Trees.
- **Data-visualization**
 - EU27 Climate Change Policies: Best practices with D3.js + Data Insights
 - World Values Distribution: Chart.js, Plotly & Tableau (API)
- **Electrical-fraud-detection**
 - State-of-the-art performance in electricity fraud detection. Comparison of a tabular approach (massive feature extraction + BorutaSHAP, XGBoost, LGBM, CatBoost, stacking) vs. a multiscale CNN with attention. Focus on operability: efficiency, explainability, and types of errors.
